SUMMARY

- Frontend ReactJS Developer with 1 year of experience building responsive and scalable web applications. Skilled in creating modern user interfaces, integrating backend services, implementing authentication systems, and delivering seamless user experiences across devices. Proficient in React.js, TypeScript, JavaScript, Redux Toolkit, and modern development practices. Strong understanding of component-based architecture, state management, performance optimization, and collaborative software development.

EDUCATION

SVPM College of Engineering, Malegaon Baramati

Bachelor of Engineering (B.E.) in Computer Engineering - CGPA - 7.5/10

DEC 2021 – MAY 2025

Baramati, Maharashtra

EXPERIENCE

Softgrid Info Pvt. Ltd. [🔗](#)

Nov 2025 - Present

Role - Full Stack Developer

Pune, Maharashtra

- Developed and maintained web applications with a focus on usability, scalability, and responsive design.
- Built reusable interface components and integrated backend services to deliver seamless user experiences.
- Implemented secure authentication and role-based access control for protected application features.
- Added real-time functionality to support instant updates and improved user engagement.
- Collaborated with designers and backend engineers to develop, test, and deploy new features.
- Participated in code reviews, debugging, and performance improvements while following Git-based workflows.

PROJECTS

College ERP System — MERN Stack [🔗](#) | [React.js](#), [Node.js](#), [Express.js](#), [MongoDB](#), [JWT](#)

Jan 2025

- Developed a centralized platform for managing student, employee, attendance, and academic records.
- Designed dashboards for administrators, faculty members, and students with role-based access.
- Implemented secure authentication and authorization using JWT.
- Managed application data efficiently through Redux Toolkit and RTK Query.
- Built responsive interfaces and optimized user workflows for daily operations.
- Structured database collections with validation and integrated RESTful services.
- Deployed the application using Vercel and Render.

Hardware Store Management Website — MERN Stack [🔗](#) | [React.js](#), [Node.js](#), [Express.js](#)

Jan 2025

- Built an inventory management solution for handling products and stock records.
- Implemented authentication and protected application routes.
- Developed features for adding, updating, viewing, and removing inventory data.
- Managed shared application state using Context API.
- Created responsive layouts to ensure a consistent experience across devices.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Java, Core Java, Advanced Java

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, React Router DOM, Redux, RTK, Responsive Design

Backend: Node.js, Express.js, REST API Development, JWT Authentication, Socket.IO

Database: MongoDB, Mongoose, MySQL

Tools: Git, GitHub, Postman, Axios, VS Code, Vercel, Render, Jest

Concepts: Component-Based Architecture, API Integration, Authentication Authorization, Protected Routes, Performance Optimization, Cross-Browser Compatibility, Debugging, Agile Development, Clean Code Practices, browser-based debugging

CERTIFICATIONS

- Object oriented programming - LinkedIn Learning
- Java Collections - LinkedIn Learning
- Introduction to Machine Learning - NPTEL

EXTRACURRICULAR

- 1st Place – Zonal Level Avishkar Competition 2024
- Selected for University-Level Project Presentation at SPPU
