Education

- **SVPM Coe Malegaon Baramati**
Bachelor's of Computer Engineering
- **TC College Baramati** 2021
HSC
92.00 %
- **MES Highschool Baramati** 2019
SSC
78.60

Experience

- **Sumago infotech** 18-12-2023 - 2-02-24
Web development Internship using MERN stack.
 - Developed expertise in constructing responsive websites utilizing the MERN stack, creating two fully functional projects that enhanced understanding of modern web development practices.

Projects

- **Vehicle Speed Measurement Using Stereo Camera Pair**
 - Depth Estimation: Applied stereo vision to calculate vehicle depth.
 - Object Detection: Used AdaBoost and machine learning algorithms for vehicle detection and tracking.
 - Speed Calculation: Designed algorithms to estimate speed based on frame-to-frame depth changes and geometric transformations.
 - Technology Stack: Python, OpenCV, AdaBoost, TensorFlow, PyTorch.
 - Achievements: Built a cost-efficient system for real-time traffic monitoring, reducing operational costs by 30% while maintaining high accuracy and scalability.
- **Store Management website for hardware shop**
 - UI Development: Designed and built responsive, user-friendly interfaces using React.js, HTML5, and CSS3.
 - Backend Development: Developed server-side functionality using Node.js to handle data management.
 - Performance Optimization: Ensured compatibility and high performance across diverse devices and browsers.
 - Key Technologies: React.js, Node.js, JavaScript (ES6+), HTML5, CSS3, Responsive Design.
 - Achievements: Delivered a functional and improving product management and user experience.
- **Online learning website**
 - Developed a responsive UI using React.js, HTML5, and CSS3, increasing user interaction by 40%.
 - Implemented add-to-cart functionality for courses, integrating MongoDB to manage user data.
 - Created reusable React components, reducing development time by 30%.
 - Added MCQ test feature and improving student assessment completion by 25%.
 - Technology Stack: React.js, Node.js, HTML5, CSS3, JavaScript, MongoDB.

Skills

- Programming Languages: Java, JavaScript, Python, C++, HTML5, CSS3
- Libraries & Frameworks: ReactJS, Bootstrap
- Databases: MySQL, MongoDB

Achievements & Awards

- 1st Place - Zonal Level Avishkar Competition (Pure Science Category) 2024, Presented a project titled "Vehicle Speed Measurement Using Stereo Camera Pair".
