HARSHAL BANKAR

Java Full Stack Developer

9156978960 | harshalbankar970@gmail.com | Pune

PROFESSIONAL SUMMARY

Java Full Stack Developer with **2 years of experience** in designing and developing enterprise web applications using **Java, Spring Boot, Spring MVC, Hibernate, Spring Security, Microservices, REST APIs, React.js/Angular, MySQL, and PostgreSQL.** Skilled in building secure, scalable, and high-performance applications with expertise in **JWT Authentication, Spring Data JPA, Maven, Git, GitHub, Docker, Jenkins, Kubernetes, and AWS.** Strong knowledge of Object-Oriented Programming (OOP), Data Structures, SDLC, and Agile/Scrum methodologies, with a focus on delivering clean, maintainable, and production-ready software solutions.

TECHNICAL SKILLS

Programming Languages: Java 8/11/17, SQL, JavaScript, HTML5, CSS3
Backend Technologies: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, REST APIs, Microservices
Frontend Technologies: React.js, Angular, Bootstrap, Tailwind CSS, Redux
Databases: MySQL, PostgreSQL, Oracle
API Testing: Postman, Swagger
Version Control: Git, GitHub
Build Tools: Maven, Gradle
Cloud & DevOps: Docker, Kubernetes, Jenkins, CI/CD, AWS EC2, AWS S3
Tools & IDEs: IntelliJ IDEA, Eclipse, VS Code
Methodologies: Agile, Scrum, SDLC

PROFESSIONAL EXPERIENCE

Java Full Stack Developer | Humanus Global Pvt Ltd., Pune
May 2024 – Present
Roles & Responsibilities

- Developed enterprise web applications using **Java, Spring Boot, Spring MVC, Hibernate, Spring Data JPA, Microservices, and RESTful APIs.**
- Built responsive user interfaces using **React.js/Angular, HTML5, CSS3, JavaScript, and Bootstrap.**
- Integrated frontend and backend applications using **REST APIs and JSON.**
- Performed unit testing using **JUnit, Mockito, Postman, and Swagger.**
- Managed source code using **Git, GitHub, and Maven.**
- Worked with **Docker, Kubernetes, Jenkins, CI/CD, and AWS for deployment and DevOps.**
- Participated in Agile/Scrum, code reviews, bug fixing, and production support.

PROFESSIONAL PROJECTS

Project 1: Digital Banking & Loan Management System
Project Description
Developed an enterprise-grade Digital Banking & Loan Management System that enables customers to manage bank accounts, transfer funds, apply for loans, monitor transactions, pay bills, and access account statements through a secure web application. The application follows a Microservices architecture and provides secure authentication, high availability, and real-time transaction processing.
Roles & Responsibilities

- Developed scalable backend services using **Java 17, Spring Boot, Spring MVC, and Hibernate.**
- Built responsive frontend interfaces using **React.js, HTML5, CSS3, Bootstrap, and JavaScript.**
- Designed normalized database schemas and optimized SQL queries for improved performance.
- Implemented CRUD operations, pagination, sorting, filtering, and advanced search features.
- Supported CI/CD pipeline implementation using **Jenkins.**
- Deployed and monitored applications on AWS **EC2 and AWS S3.**
- Used Git and GitHub for version control, branch management, code reviews, and pull requests.
- Participated in Agile Scrum ceremonies including sprint planning, daily stand-ups, code reviews, and retrospectives.

Project 2: Healthcare Management & Electronic Medical Records (EMR) System

Project Description

Developed a comprehensive Healthcare Management and Electronic Medical Records (EMR) System for hospitals and clinics to manage patient registrations, doctor appointments, electronic health records, prescriptions, laboratory reports, billing, and insurance claims. The platform provides secure access to medical data with role-based authorization and scalable Microservices architecture.

Roles & Responsibilities

- Developed enterprise backend applications using **Java, Spring Boot, Hibernate, and Spring Data JPA.**
- Designed RESTful APIs for patient registration, appointment scheduling, doctor management, prescriptions, billing, laboratory reports, and medical records.
- Developed responsive frontend modules using **Angular, HTML5, CSS3, Bootstrap, and TypeScript.**
- Integrated PostgreSQL database and optimized SQL queries for high-performance data retrieval.
- Integrated REST APIs between frontend and backend using **JSON-based communication.**
- Created centralized exception handling, logging, validation, and audit trail functionality.
- Assisted in CI/CD automation using Jenkins and cloud deployment on **AWS.**
- Worked in Agile Scrum teams, collaborating with QA engineers, Business Analysts, UI/UX designers, and product owners.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science

Savitribai Phule Pune University (SPPU), Pune, Maharashtra
